

## GRAPHIC DESIGN AND CAD

We excel in the visual representation of our ideas.

Graphic design and CAD is an integral part of our business. Our team of talented graphic and CAD designers are experienced in conveying complex information to a variety of different audiences, utilising a range of media. Our exhibition design, promotional documentation, illustrative sketches and perspectives, website design, animation and 3D modelling are considered by our clients to contribute greatly to the success of our project work.

Presentation is central to the communication of our concepts and proposals. Working at the heart of every project team, our graphic and CAD designers provide valuable input when adapting and refining ideas through the creative process, producing a full range of bespoke material to effectively illustrate our work.
