

STRATEGIC PLANNING

We pride ourselves on our ability to “think big”.

Understanding how regions are shaped and how we can influence patterns of future growth is one of our greatest strengths. Working on projects across the UK and beyond, we use our expertise in spatial planning to undertake long term ‘visioning’ and help shape growth strategies at the regional level and beyond. Our GIS specialists work closely with our other professional staff which allows us to have a greater appreciation of the ways in which GIS analysis can refine our spatial planning and design work.

We also relish the opportunity to help others co-ordinate their emerging visions. Bringing together diverse interests and differing priorities, we shape comprehensive plans which are sufficiently robust to form the basis of statutory planning frameworks or area development strategies which will stand the test of time.
